

Marine Anchors

Delta Anchor

High Holding Power Delta Anchor, Welded type. High-grade manganese steel used in the construction of the Delta anchor gives it maximum tensile strength. Unique shank profile and ballasted tip make the Delta anchor self-launching. Low centre of gravity and self righting geometry ensure that the Delta anchor will set immediately

Max weight to 30tons.

Method: Sand Casting

Equipments : 20 tons electric arc furnace.

Inspection Facility:

1. Mechanical Property and Chemistry Analysis.
2. Magnetic Particle Testing
3. Penetrating Testing
4. Ultrasonic Testing
5. Radiographic Testing
6. Spectrometer

Certificated by : LR, DNV, ABS, BV, NK and GL.
